

INDEPENDENT SMART HOME

Coming Soon

A Smarter Way to Live More Independently

Independence looks different for everyone. When a home is designed with the right supports from the start, adults with intellectual and developmental disabilities can build the confidence and routines to live life on their own terms.

The **Aspire Independent Smart Home** is being developed as a modern, flexible living environment that supports independence while preserving safety, dignity, privacy, and personal choice.

This May Be a Good Fit For Someone Who:

- Is ready to live in a home that offers greater independence.
- Benefits from routines, prompts, environmental controls, or safety supports.
- Thrives when support is built around their own goals, strengths, preferences, and needs.

Smart Technology. Personalized Support. Greater Independence.

Your Home, Your Way

Picture A Home Designed to Support You to...

Control Your Space

Adjust lights, temperature, and blinds with a touch or a voice.

Stay Safe

Sensors, alerts, and smart locks that offer peace of mind.

Build Routines

Reminders for schedules and medication, right when you need them.

Stay Connected

Communication tools and video calls to stay in touch with the people who matter.

Cook and Live

Cooking and daily tasks made easier, so independence feels natural.

Ready to Make Yourself at Home?

Whether you're looking for your next home, exploring options for a family member, or supporting someone on their journey to greater independence, we'd love to start the conversation about the Aspire Independent Smart Home and whether it can help you achieve your goals.
